

Galiara has partnered with elite real estate properties in San Francisco to provide and rotate artwork to enhance these buildings lobbies and common spaces. Using our curatorial expertise and our wealth of talented, innovative and diverse artists, we bring a new level of support to real estate agents and developers. Partnering with the gallery is an easy and stress-free experience. The gallery curatorial staff manages all project logistics from conception of the artworks chosen, to installation and pricing strategies suitable to any budget. After spending some time on-site to acquaint ourselves with the space and the clientele, we select from our vast collection of artwork to find pieces that are appropriate in size, medium, color and subject matter. We then provide a final selection of pieces for approval and personally deliver and hang the artwork according to client desires.

Renting art lets you share your soul with a painting or sculpture before making the commitment to purchase it. At the end of each rental term you have the option to buy the work. We will apply 50% of the rental fees paid toward the purchase price.
